KEY PROJECTS

- **Bid2Win** *[React.js, Node.js, Redis, Python Scripting, MongoDB]*
 - Leveraged Redis for high-speed caching and rapid data retrieval, significantly boosting back-end performance.
 - Utilized Python scripting for automated background jobs, data processing, and system task execution.
 - Engineered responsive front-end components using React.js and robust Node.js backend API services.
- **Sportway** *[React.js, TypeScript, Tailwind CSS, GCP, Blogger, Firebase, GitHub]*
 - Designed and integrated modern front-end features including real-time sports updates, secure login, and admin dashboard.
 - Embedded and customized Blogger-based modules to dynamically display sports news and event content.
 - Refactored codebase for responsiveness and state management using Formik, Yup, Axios, and React Query.
- **Lucky 1** *[React.js, Node.js, MySQL, AWS, GitLab]*
 - Designed and integrated core front-end and back-end features according to client and business requirements.
 - Collaborated with senior developers and project managers to meet agile project milestones and optimize system performance.
- **Adstudio Dashboard** *[React.js, AWS EC2, GitLab]*
 - Designed and integrated analytics dashboard features into the front-end interface based on client specifications.
 - Performed regular bug fixes, component refactoring, and codebase enhancements.
- **Meemure Village Camping** *[React.js, Node.js, Firestore Database, Firebase Cloud, GitHub]*
 - Developed full-stack web application with dynamic booking management and responsive UI tailored to client feedback.
